# **IMDB Analysis**

Name - Samiksha Zagade

## **Project Description**

The dataset is related to IMDB Movies. A potential problem to investigate could be: "What factors influence the success of a movie on IMDB?" Here, success can be defined by high IMDB ratings or IMDB score that is assigned to each movie. The impact of this problem is significant for movie producers, directors, and investors who want to understand what makes a movie successful to make informed decisions in their future projects.

## **Approach and Tech Used**

The approach here to first clean the data that includes handling the null values, handling outliers and understanding the data. After the data is cleaned and understood I have tried answering the questions to provide insights that can drive decision-making. The tech used here is excel. Excel is a versatile tool for data analysis due to its user-friendly interface and widespread accessibility. Its array of functions and features allows for quick data manipulation, facilitating easy organization and visualization. For straightforward analyses or initial data exploration, Excel's pivot tables, charts, and formulas provide a solid foundation. While it may have limitations for handling large datasets or complex statistical analyses compared to specialized software, Excel remains an efficient and practical tool for basic data analysis and quick insights.

#### **Results**

- The data has 3752 rows and 28 columns.
- Movie Genre Analysis
  - I have analysed the distribution of movie genres and their impact on the IMDB score.

- The most common genres of movies in the dataset are Comedy,
  Action, Drama, Adventure and Crime with count to be 988, 957, 668,
  368 and 255 respectively.
- o Comedy has average of 6.2 imdb rating.
- Then, for the first three mot common genre, I have calculated descriptive statistics as shown below.

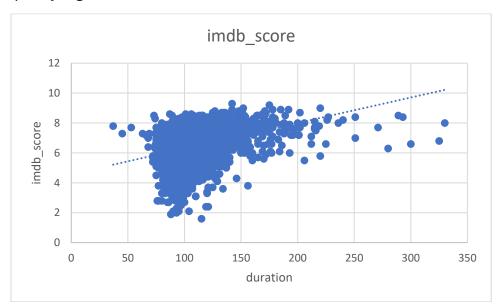

| Comedy             |          | Action             |          | DRAMA              |          |
|--------------------|----------|--------------------|----------|--------------------|----------|
|                    |          |                    |          |                    |          |
| Mean               | 6.16842  | Mean               | 6.29112  | Mean               | 6.83159  |
| Standard Error     | 0.03286  | Standard Error     | 0.0336   | Standard Error     | 0.03502  |
| Median             | 6.3      | Median             | 6.4      | Median             | 6.9      |
| Mode               | 6.4      | Mode               | 6.6      | Mode               | 6.7      |
| Standard Deviation | 1.03275  | Standard Deviation | 1.03954  | Standard Deviation | 0.90519  |
| Sample Variance    | 1.06658  | Sample Variance    | 1.08064  | Sample Variance    | 0.81938  |
| Kurtosis           | 1.78242  | Kurtosis           | 0.84862  | Kurtosis           | 1.75238  |
| Skewness           | -0.93076 | Skewness           | -0.49203 | Skewness           | -0.94173 |
| Range              | 6.9      | Range              | 6.9      | Range              | 6.7      |
| Minimum            | 1.9      | Minimum            | 2.1      | Minimum            | 2.1      |
| Maximum            | 8.8      | Maximum            | 9        | Maximum            | 8.8      |
| Sum                | 6094.4   | Sum                | 6020.6   | Sum                | 4563.5   |
| Count              | 988      | Count              | 957      | Count              | 668      |

### Duration Analysis –

- Analysed the distribution of movie durations and identified the relationship between movie duration and IMDB score.
- The descriptive statistics for the duration is shown below where the mean is 110.2, median is 106 and mode as 101.

| Duration           |             |  |  |
|--------------------|-------------|--|--|
|                    |             |  |  |
| Mean               | 110.2579872 |  |  |
| Standard Error     | 0.369523832 |  |  |
| Median             | 106         |  |  |
| Mode               | 101         |  |  |
| Standard Deviation | 22.64671656 |  |  |
| Sample Variance    | 512.8737711 |  |  |
| Kurtosis           | 12.62739704 |  |  |
| Skewness           | 2.402551754 |  |  |
| Range              | 293         |  |  |
| Minimum            | 37          |  |  |
| Maximum            | 330         |  |  |
| Sum                | 414129      |  |  |
| Count              | 3756        |  |  |

- The relationship between imdb score and duration is that the imdb score is saturated when duration is between 75 and 150 approx.
- Towards the start and the end very few ratings are seen but those ratings are pretty high around 8.

## Language Analysis-

 I determine the most common languages used in movies and analysed their impact on the IMDB score using descriptive statistics.

| English French     |          | Mand       | Mandarian |            |          |
|--------------------|----------|------------|-----------|------------|----------|
|                    |          |            |           |            |          |
| Mean               | 6.427043 | Mean       | 7.355882  | Mean       | 7.08     |
| Standard Error     | 0.017514 | Standard E | 0.089082  | Standard E | 0.199332 |
| Median             | 6.5      | Median     | 7.3       | Median     | 7.4      |
| Mode               | 6.7      | Mode       | 7.2       | Mode       | 7.9      |
| Standard Deviation | 1.050538 | Standard E | 0.519435  | Standard [ | 0.77201  |
| Sample Variance    | 1.10363  | Sample Va  | 0.269813  | Sample Va  | 0.596    |
| Kurtosis           | 1.186555 | Kurtosis   | 1.160239  | Kurtosis   | -0.95414 |
| Skewness           | -0.72834 | Skewness   | -0.49292  | Skewness   | -0.65778 |
| Range              | 7.7      | Range      | 2.6       | Range      | 2.3      |
| Minimum            | 1.6      | Minimum    | 5.8       | Minimum    | 5.6      |
| Maximum            | 9.3      | Maximum    | 8.4       | Maximum    | 7.9      |
| Sum                | 23124.5  | Sum        | 250.1     | Sum        | 106.2    |
| Count              | 3598     | Count      | 34        | Count      | 15       |

- The most common Language preffered is English with highest count of 3598.
- o Compared to English no other language has such a large audience.
- French has count 34 and mandarian as almost half the audience of French.
- The standard deviation of English language is 1.051. The standard deviation shows the variation and spread of the data. Here the standard deviation is less which shows that it is less deviated.

#### Director Analysis –

 I have then Identified the top directors based on their average IMDB score and analysed their contribution to the success of movies using percentile calculations.

| Row Labels        | Average of imdb_score |              |     |
|-------------------|-----------------------|--------------|-----|
| Akira Kurosawa    | 8.7                   |              |     |
| Alfred Hitchcock  | 8.5                   | Max avg      | 8.7 |
| Asghar Farhadi    | 8.4                   | Percent rank | 1   |
| Billy Wilder      | 8.3                   | Percentile   | 8.7 |
| Charles Chaplin   | 8.6                   |              |     |
| Christopher Nolan | 8.425                 |              |     |
| Damien Chazelle   | 8.5                   |              |     |
| ritz Lang         | 8.3                   |              |     |
| ee Unkrich        | 8.3                   |              |     |
| enny Abrahamson   | 8.3                   |              |     |
| Majid Majidi      | 8.5                   |              |     |
| Richard Marquand  | 8.4                   |              |     |
| Ron Fricke        | 8.5                   |              |     |
| Sergio Leone      | 8.433333333           |              |     |
| Tony Kaye         | 8.6                   |              |     |

- The percentile shows that success rate is 100%.
- The top three directors are Akira Kurosawa, Alfred Hitchcock and Asghar Farhadi.
- o The maximum average imdb score is 8.7 director is Akira Kurosawa.

#### Budget Analysis-

- I have then analysed the correlation between movie budgets and gross earnings, and identified the movies with the highest profit margin.
- The correlation between the budget and gross is 0.091which shows that the relationship between the two is quite weak though it is positively correlated.
- That tells us that the budget and gross earnings have a huge gap and no correlation. The gross earning is either maximum compared to budget in some cases and in some cases the earning might be very less compared to budget.

# Insights

- Comedy, Action and Drama are in more demand and common genres.
- Directors can prefer making a movie of Comedy genre as this genre has highest demand by the audience.
- The duration between 75 and 150 has maximum count of ratings ranging from
  8 to 2 approx. Highest variation is seen between this duration range.
- The highest viewed movies is of English language. The movies with English language will have a big audience which will increase the reach of the movie to maximum people.
- So making a movie of English language will be very beneficial.
- The directors like Akira Kurosawa, Alfred Hitchcock and Asghar Farhadi have the making average rating for their movies. Thus working with these top three directors has high percent of movie success.
- If these directors make a movie in English then maximum profit will be gained.
